### OBJECTIVE

#### - Pursuing Web Development

Furthering my career by pursuing a position as a Web Developer. Planning to enhance these those skills with my next opportunity/further education in order to develop new skills in Web Development. Took a career change in mental health, but I'm looking to get back into web development

### PROFESSIONAL EXPERIENCE

3 years of total QA testing websites for schools and office which are now fully functional. Used scrum which is an agile approach to software testing for our QA testing. 4-5 years of total in management experience. I have managed a team of QA testers. Kept a backlog of all our work and ensured projects would be completed on time. Good Self Learning, Problem Solving, Analytical individual with strong interpersonal and communication skills.

### TECHNICAL SKILLS:

Project Manager: Scrum, Agile, SDLC, Sprint

Languages: SQL, UNIX/Linux, PL/SQL, T-SQL, Unix Shell Scripting, Python, JavaScript, C, C#, C++, .Net, Visual Basic, COBOL, PHP

Operating system: Windows, UNIX/Linux

Web technologies: HTML, XML, CSS

### WORK EXPERIENCE

#### Care Coordinator

August 2018 – Present

West Health Advocate | Exton, PA

Currently employed as a care coordinator at West Health Advocate. Mainly responsible for maintaining the database for all our approved counselors. Data for the counselors is entered every day, and I have to verify all the information entered is correct and up to date. I am also responsible for a number of clients, research therapists for those clients, look through all their data, and connect them with an appropriate counselor. I work directly with my clients, counselors, and my department

Highlights of my time as a Care Coordinator

- Being available 24/7 to respond to any issues reported by either a client or management
- Ensuring data for the counselors are accurate and up to date
- connect clients with counselors in our database

#### IT Project Manager

May 2015 – August 2018

Praxlinx | Atlanta, GA

Employed to work in a fast-paced 24/7 atmosphere. Mainly responsible for a small team of QA testers. We used scrum to manage the workflow for each of our projects. I communicated daily with our CEO, Clients, and team members about the progression of our current project. After accepting a project, we would hire on testers for the project, created a schedule using scrum, then we implemented the scrum schedule in order to complete our projects on time. We mainly did QA testing on websites for school and small businesses.

Highlights of my career as a IT Project Manager:

- Being available 24/7 to respond by either a client of management
- Managed a team of QA testers
- Used Scrum, SDLC, and Sprint to manage our work schedule
- Gained experience with QA testing

### EDUCATION:

B.S Computer Information Systems May 2017
